

# Dehyton<sup>®</sup> SFA

Very mild, easy-to-handle surfactant blend for liquid rinse-off products

## Performance Profile

## Brief Overview

**INCI Name:** Cocamidopropyl Betaine and Disodium 2-Sulfolaurate

### Technical information:

- **Appearance:** Liquid, yellowish
- **Active matter:** ~30%
- **pH:** 4.3 – 5.3
- **Preserved with Sodium Benzoate**

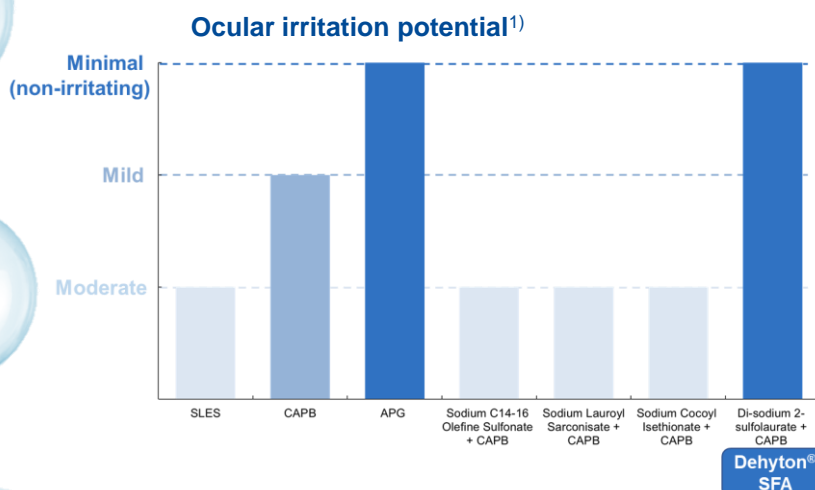

### Formulations:

- Micellar Shampoo (HB-DE-15-223-228)
- Clear Conditioning Shampoo (HB-DE-15-223-161)
- Mild foam boost Shampoo (HB-DE-15-223-148)
- Mild Intimate Wash (HB-ES-19-1905-10-2)

### Fields of Application:

- Shampoo
- Body Wash
- Facial Care
- Baby Care
- Intimate care

- Outstandingly mild to skin & mucous membrane

- Providing a creamy & rich foam
- Micellar viscosity build-up without thickener
- Ideal for low pH (4.5 – 5.5) formulations
- Ideal for conditioning shampoos:
  - Excellent wet and dry combability results
  - Enhances conditioning performance of cationic polymers

## Sustainability benefits

- 79% natural origin according to ISO 16128 standard<sup>2)</sup>
- RSPO Mass Balance certified sustainable
- Readily biodegradable
- Suitable for solutions not containing EO

### Labels:

- Suitable to the requirements of **COSMOS V.4** entering into force in 2023<sup>3)</sup>
- **Safer Choice** approval (US EPA label)
